Kaiqing (Katherine) Yang

+1 860-212-3483 | ky453@cornell.edu | https://ky453.github.io/katherine-yang/

EDUCATION

Cornell University, Expected May 2028
B.A. in Information Science & Art History, Minor in Business
GPA: 4.004

RELEVANT COURSEWORK

Product Strategy, Digital Product Design, AI Application Development, Data Science (in progress), Interactive Web Development, Introduction to Marketing, Financial Accounting

EXPERIENCE

Cloudsky - Panghe Cloud Gaming — **Shenzhen, China**
Product Manager Intern — Jul 2026 - Aug 2026

- Analyzed end-to-end customer journeys across payment, balance, queue, session, and storage, using ChatGPT & Claude with structured prompting and source-grounded synthesis to organize user feedback while validating findings against product context.
- Synthesized customer and competitive insights across UX, pricing, support, community, and promotions into prioritized recommendations during a period when daily new users grew 66%, active users 49%, and paying users 40%.
- Partnered with design, engineering, and operations to translate customer needs, edge cases, and technical constraints into shippable product behaviors, documentation, and release workflows.

HONOR — **Shenzhen, China**
UX Motion Design Intern — Jun 2025 - Aug 2025

- Designed and iterated onboarding interactions across mobile, tablet, and foldable products, partnering with UI designers and engineers to balance user experience with implementation constraints.
- Conducted competitive research across leading consumer technology products, using Gemini and Claude with iterative prompting and multi-model comparison to accelerate synthesis of interaction trends and product opportunities, refining findings through human review.

China Merchants Bank — **Shenzhen, China**
Account Manager Intern, Corporate Banking — Jun 2024 - Aug 2024

- Researched corporate clients' business models, financial positions, competitive environments, and financing needs to build a fuller understanding of customer objectives and support tailored banking conversations.
- Participated in client visits and prepared KYC/due-diligence materials, combining qualitative customer context with financial and risk information to support onboarding and relationship management.

SELECTED PRODUCT PROJECTS

Local LLM AI Recipe Generator (Vue.js, WebLLM, GitHub Copilot, PWA) Live Demo

- Building a task-specific recipe assistant that runs a local LLM in the browser, using prompt engineering to turn user preferences and constraints intotailored recipe outputs while balancing response quality and latency.
- Using an AI coding agent with an AGENTS.md specification to prototype and refine the application, dynamically modify system prompts, support configurable personas/output formats, and deploy the final experience as an installable PWA.

Cornell Movies (Full-Stack Community Events Product)

- Built a full-stack event discovery product with React, Node/Express, MongoDB, and REST APIs, supporting search, filtering, event details, likes, and loading/error states.
- Used Codex, Copilot, and AI-assisted debugging with context-aware prompting and iterative debugging to accelerate implementation and troubleshoot front-end/backend integration while validating generated code against product requirements and application behavior.

Duolingo Podcast Feature (Digital Product Design)

- Conducted qualitative user research to identify gaps between gamified language learning and real-world listening and speaking, synthesizing pain points around confidence, grammar, and contextual practice.
- Evaluated podcast learning, AI pronunciation coaching, and peer exchange based on user value, feasibility, and scalability; prioritized the podcast direction and iterated after usability testing exposed friction in discovery, playback, and saved content.
- Defined engagement, completion, and repeat-listening metrics to evaluate adoption and learning behavior after launch.

LEADERSHIP

Cornell MCSA, President

- Led cross-functional teams across programming, external relations, publicity, and operations, aligning members and external partners around shared community and professional-development goals.
- Secured $16K+ in sponsorships through partner outreach, tailored proposals, and relationship management; initiated a Shanghai incoming-student forum connecting students with academic, career, and campus resources.

SKILLS

Product & Research: Product Strategy, Customer Research, User Interviews, Usability Testing, Requirements & Use Cases, User Journeys, Competitive Analysis, MVP Prioritization, Experimentation, Product Metrics
AI & Protoyping: ChatGPT, Claude, Codex, Gemini, Lovart, Image 2, Seedance; Prompt & Context Engineering, RAG, AI Agents; AI-assisted Research, Synthesis, Visual Exploration, Prototyping & Development
Technical: Python, JavaScript, React, Node.js, Express.js, REST APIs, MongoDB, Git/GitHub, HTML/CSS
Design & Business: Figma, Lottie, Excel, Notion **| Languages:** English, Mandarin Chinese
